### The trust score of mwrindia.in is rather low. Why?

The trust score rating of the website is rather low. mwrindia.in may be a scam.

We determined the trust score using a computer algorithm. The algorithm looks at 40+ data points on which basis it creates a trust score. Sources are third party reviews, the location of the company, the

We determine the trust score using a computer algorithm. The algorithm looks at 10+ data points on which basis we create a trust score. Factors include a party's history, the location of the company, the hosting party used by the website, if the website has been reported to sell fake products, etcetera.

As the review of the website is somewhat low, please do take time to [check the website yourself](#). Our trust score is only a recommendation.

### Positive highlights

### Negative highlights

- ✗ The identity of the owner of the website is hidden on WHOIS
- ✗ The age of this site is (very) young.
- ✗ The website is located in a high risk country.
- ✗ SSL certificate was not identified (source: [Xolphin SSL Check](#))
- ✗ This website is not optimized for search engines

## Entire Review [mwrindia.in](#)

### Company Review

The identify of the website owner has been hidden. This may be done for a valid reason as spammers use this information to email website owners. Unfortunately is also makes identification of the owner difficult. We prefer if the website does show his true identity.

### Webshop Review

This website was set-up recently. As a result, we advise you to really take the time to check this site out before you interact with it. You can use our blog post "[How to recognize a scam](#)" to do so. Scam sites are often very young. They are removed from the web after a couple of months as too many consumers leave negative reviews and social media comments. Till that time, they will try to scam you.

### Technical Review

The website is being hosted in a country with a high level of fraud and corruption according to the International Banking Federation. The risk of doing business with these kind of countries is therefor higher.

No SSL certificate could be found. For smaller websites who only share content and do not require you to create an account or fill in a form, they is still okay. For any other website this is a serious security breach as communication between your computer or mobile and the website is not secured (source: [Xolphin](#)).

We checked if the website is optimized for search engines like Google and Bing. This does not seem to be the case. Several items are missing which most websites implement to make sure they can be found by search engines. We consider this suspicious. Why would a website not want to be found via search engines? This is usually the case if they do not want to be found by police authorities or brand protection agencies.

### How to Recognize a Scam

As the influence of the internet rises, so does the prevalence of online scams. There are fraudsters making all kinds of claims to trap victims online - from fake investment opportunities to online stores - and the internet allows them to operate from any part of the world with anonymity. The ability to spot online scams is an important skill to have as the virtual world is increasingly becoming
