**Fishermen Community at Campbell Bay Plans to Block Roads on 8th Nov; Demands from Administration to Refuse Permission for Fishing to Legally Licensed Long Line Boat**

**[READ STORY ON WEBSITE](#)**

**Tarun Karthick**

Campbell Bay, 07  
November 2021

The Fishermen Community of Campbell Bay, Great Nicobar has threatened to block roads on 8th November 2021 to press for their demand of refusing permission for fishing to a legally licensed long line boat.

The members of the community are strictly against any long line boat to operate from Campbell Bay. A well renowned local businessman of Campbell Bay invested lakhs of

rupees and procured a long line boat to operate from Campbell Bay.

The members of the fishermen community while speaking to Nicobar Times during their dharna in front of the Fisheries Ice Plant on 5th November 2021, informed that if the long line boat operates, then their business will suffer and they will have no means to earn their livelihood.

The members of the fishermen community on multiple occasions blocked the entry of the Fisheries Ice Plant at Campbell Bay to prevent the staff of the long

line boat from procuring ice blocks.

The Govt. of India has been focusing on encouraging people to invest in the fisheries sector, to increase the capacity of the country to tap the fisheries resources, such hurdles created by the local fishermen of any region will discourage people from investing.

Great Nicobar Island can become a fisheries powerhouse. Proper transportation facilities for the catch of the fishermen should be arranged, so that their catch can be sold at other markets, where demand is substantial.

The current problem is that the fishermen have no means to transport their catch to Port Blair on time because of the unavailability of any means of transport. Their catch is stored in the cold storage of the Fisheries Department for months, because of which the quality degrades and the traders of Port Blair refuse to buy their stock.

At present, the local fishermen sell their catch primarily to traders of Car Nicobar Island. Transportation should be made available to them so that they can sell their produce to traders in Port Blair on time.

None of the problems of the fishermen gives them an excuse to stop a legally licensed fishing boat from operating by creating hurdles. The Indian Constitution guarantees the 'Freedom to Practice any Profession, or Carry on any Occupation, Trade or Business' for all citizens.

It should be the top priority for the Administration to ensure that a legally licensed long line boat should be allowed to carry on fishing and no person is able to create any hurdle in its operation through protest or anything otherwise.

The problems of the fishermen community are arising because of the non-availability of proper means of transport to export their produce on time to other regions. The non-availability of proper transport facility is the precursor to the protests happening to stop the operation of the legally licensed longline fishing boat.

# MP Visits Manjeri; Requests Secretary APWD to Construct Filter Bed for Clean Water Supply

[READ STORY ON  
WEBSITE](#)

[Rohit Kumar](#)

Port Blair, 7 Nov 2021

Mr. Kuldeep Rai Sharma, Member of Parliament, Andaman and Nicobar Islands recently visited Manjeri village of South Andaman and during his visit, the villagers informed him that they have been getting untreated and muddy drinking water, which is causing health issues.

The villagers further informed the MP that even though the village is located very close to Dhaniakhali Dam, the villagers are getting drinking water only every third day, which is

insufficient for their daily routine.

MP personally visited various water sources in the village and found that water supplied to the villagers is untreated and muddy.

Considering the problems being faced by the villagers of Manjeri, the Member of Parliament, requested the Secretary, APWD to provide water to the village every second day. He also requested the Secretary, APWD to construct a filter bed for water treatment in the village, so that the villagers can get treated water and save themselves from water-borne diseases.
